

DI-PENTAERYTHRITOL

Description

- Di-Pentaerythritol is a White to Off white Crystalline Granular or powder material
- Dimer of Pentaerythritol
- Polyhydric alcohol containing Six primary hydroxyl groups

Applications

- Alkyd resins
- Rosin esters
- Synthetic Lubricants

Packing forms

- Antistatic Type C Jumbo bags 500 Kg

Sales specification

Di-pentaerythritol content,% ¹	Min 82
Monopentaerythritol content,% ¹	Max 5
Hydroxyl number,mg KOH/g ²	Min 1253

Typical properties

Tri-pentaerythritol content,% ¹	9-12
Ash content(as Na ₂ SO ₄),% ³	Max 0.1
Water content,% ⁴	Max 1
Sieve analysis: ⁵	
Particle size: Can be customized*	

Analytical Method

¹ P 22a-(PC-b-15)-1, ² P 22b-3a, ³ P 22b-4, ⁴ P 22b-1, ⁵ P 22b-14

Analytical methods are available on request

*Particle size can be customized as Granular or Powder on request.

CAS No.:126-58-9
